PAUL DAVID AZEMOH

Senior Software Engineer

(234) 813-2078-657 | paul.azemoh@gmail.com

https://www.linkedin.com/in/dazemoh | https://paulazemoh.netlify.app

PROFILE

Software engineer with over 11 years building and shipping secure, production software across fintech, agritech and public sector platforms, from web and mobile applications to distributed backend services and AI infrastructure. Comfortable across Node.js, TypeScript, Java, Python and Rust, with hands-on cloud, DevOps and database experience. Most recently built a Python SDK and a Rust serving engine for private AI. Delivers in Agile teams, remote or onsite, writes maintainable code, and mentors other engineers.

KEY COMPETENCIES

- Node.js & TypeScript
- React.js
- Distributed systems
- AI infrastructure & inference
- Java
- REST & GraphQL APIs
- Cloud infrastructure (AWS, GCP)
- Testing & TDD
- Python & Rust
- PostgreSQL, MongoDB & Redis
- Docker, Kubernetes & CI/CD
- Agile & Scrum

WORK EXPERIENCE

Oragonlabs | Nigeria & USA **Jan 2026 – Present**

Chief Engineer & AI Researcher

- Lead engineering and AI research at Oragonlabs, the infrastructure layer for private, sovereign AI that you own rather than rent.
- Built and published the product: a Python SDK and a Rust serving engine with continuous batching, chunked prefill and a shared prefix cache, handling 200,000 requests in 3.0 seconds, backed by 313 automated tests.
- Designed the licensing layer: Ed25519 signed licences, XChaCha20-Poly1305 sealed model weights that open only in memory, and a hash-chained tamper-evident usage ledger, all working fully offline.

ByteX Financial (formerly Cenne Financial) | Canada **Apr 2026 – Present**

Senior Software Engineer, ByteX; VP of Engineering, Cenne Financial (Remote)

- Builds services for ByteX's global payment and settlement infrastructure: cross-border collections, payouts, FX, payment routing and settlement across Canada, the United States, India and Africa.
- Previously led engineering at Cenne, the AI powered financial platform for SMBs in Canada and Africa, covering accounts, cross-border payments, cards and bookkeeping across 150+ countries.
- Carried the Cenne platform through its merger into ByteX, integrating it with ByteX's shared technology, compliance and liquidity foundation.

Bullion | USA **Aug 2025 – Mar 2026**

Senior Software Engineer & VP of Engineering (Remote)

- Led development and architecture of high-availability financial platform services, optimised for performance and reliability in production.
- Improved deployment stability through structured CI/CD and release controls, and implemented monitoring to enhance incident response.
- Provided technical leadership and mentorship, supporting engineers across distributed teams.

TeflonHub | Lagos, Nigeria **Aug 2023 – Jul 2025**

Lead Platform Engineer (Remote)

- Led design and development of core application components across the full software development lifecycle, from design through deployment.
- Collaborated within an Agile Scrum team, working with the Scrum Master to estimate effort for new features.
- Ensured service stability, availability and scalability, managing releases, upgrades and performance across front-end and back-end stacks.
- Mentored the engineering team on architectural best practices and distributed system design.

Payfrontier LTD | Abuja, Nigeria **Jan 2020 – Jul 2023**
Senior Developer/CTO (Remote & Onsite)

- Architected a full-stack fintech platform serving 20,000+ active customers across web and mobile channels.
- Designed a microservices ecosystem spanning web, mobile and administrative systems for the platform.
- Directed system-wide performance optimisation and horizontal scalability planning across engineering teams.
- Led engineering vision, aligning business growth strategy with technical architecture decisions.

Thrive Agric LTD | Abuja, Nigeria **Feb 2018 – Dec 2019**
Software Developer (Remote & Onsite)

- Built distributed APIs powering crowdfunding and payment platforms servicing 500,000+ monthly users.
- Architected backend modules and microservices supporting finance, operations, growth, capital allocation and user onboarding.
- Enforced system stability and high-availability release cycles across national agricultural infrastructure.
- Managed, monitored and trained engineers across technology teams.

UNESCO | Abuja, Nigeria **May 2016 – Jan 2018**
Software Engineer - Program Manager (Onsite)

- Delivered structured software architecture training to 400+ youths in partnership with Microsoft and UNESCO.
- Designed curriculum integrating scalable backend design principles and coordinated institutional-level technology program implementation.

Freelance/Web Developer **Nov 2014 – Apr 2016**
Web Developer (Remote)

- Developed custom web solutions for business clients based on specifications.
- Built and maintained a portfolio of applications consolidating data from multiple services.
- Managed all aspects of web application delivery, including design, testing, debugging and deployment.

EDUCATION

Ecotes University, De La Grace, Benin | Benin **2013 – 2017**
Bachelor's degree, Computer Science

CERTIFICATIONS

Cisco **2016**
CCNA, Cisco Networking

NIIT (Bics LTD) | Abuja, Nigeria **2015**
Professional Diploma, Network Engineering: database administration, logic building, problem-solving, C++ object-oriented programming, CCNA, MIS, MCSE, Linux server administration and network security

EC-Council **2013**
Certified Ethical Hacker, Systems and Security

SKILLS & OTHER

System Design: Distributed microservices architecture, domain-driven boundary definition
Languages: Node.js, JavaScript, TypeScript, Java, Python, Rust, Ruby
Frameworks/Libraries: Express.js, Django, Spring Boot, React.js, Redux, React Native
Databases: MongoDB, PostgreSQL, MySQL, Redis
Cloud Services: AWS, GCP, DigitalOcean, Azure, Heroku
DevOps/Tools: Docker, Kubernetes, Git, CI/CD (GitHub Actions, Jenkins, Travis CI), PM2, CloudWatch, Terraform, Ansible, Helm
AI Tools: Cursor, Claude Code, Codex, Gemini
Other Technologies: HTML5, CSS, GraphQL, Kafka, Tailwind
Methodologies: SCRUM, Agile, SDLC, TDD
Documentation: API Documentation, Technical Writing, Markdown, Confluence
Spoken languages: English, fluent (C2)
